## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance:

After carefully reviewed the Applicant's arguments and newly amended claims in paper filed 7/8/04, and updated prior art of record, the Examiner finds that the Applicant's arguments and newly added limitations are reasonable and strongly persuasive. Therefore, they place the application in condition for allowance. The primary reason for the indication of the allowability of the above claims is the inclusion therein, in combination as currently claimed, of the limitation of the field plate that extends beyond the third region. It should be noted that even though the cited art discloses a similar structure of the device, but it does not clearly show the length of the field plate since part of the device has being cut off. Applicants, however, convincingly argue that the prior art 's field plate does not extend beyond the third region as currently claimed. Therefore, Applicants believe the cited are does not fully anticipate all of the claimed limitations. This limitation is found in the above claims and is neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
